DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3, 9-13, 20-22, 28, and 32, drawn to a method and unit for generating a code to be embedded in a predetermined content, classified in class 380, subclass 44.
 - II. Claims 4-8, 14-19, and 23-27, drawn to a method and unit for detecting an embedded code to determine if a collusion attack has occurred, classified in class 713, subclass 176.
 - III. Claims 29-31, drawn to watermark embedding and watermark detecting units, classified in class 382, subclass 100.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as generating a code to be embedded into a predetermined content, invention II has separate utility such as detecting an embedded code so as to determine a collusion attack, and invention III has separate utility such as watermarking a predetermined content and detecting the watermark in a predetermined content. See MPEP § 806.05(d).

Art Unit: 2621

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Joseph A. Scafetta (Reg. No. 24,913) on December 3, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
